Taita Taveta University

2024,

Second Class Honours (Upper Division)

SKILLS

- PHP & MySQL Development
- Web Development & Deployment
- Networking & IT Support
- Social Media Management
- Team Leadership & Collaboration

SUMMARY

James Ruwa is an entry-level software developer with hands-on experience in PHP development, network support, and team-based project execution. Currently leading the development of Kodiit—a web-based event planning and item rental platform—he brings a mix of technical ability, leadership, and problem-solving. With experience gained from internships and university projects, he is eager to contribute to professional teams and help organizations build scalable, efficient digital solutions.
